CAREER IMPACT AT A GLANCE

25+ YEARS	\$100 Million	\$5.5 Billion+	10,000+	25+	#1 GLOBALLY
FORTUNE 500 & DEEP-TECH LEADERSHIP	IT PORTFOLIO GOVERNED	M&A — 3 INTEGRATIONS LED	EMPLOYEES — GCC BUILT FROM 1	GLOBAL COES, APPS TO OPS	4 CONSECUTIVE YEARS, INNOVATION & EXCELLENCE

EXECUTIVE SUMMARY

Full-spectrum enterprise technology executive who has personally owned every layer of modern IT applications, platforms, middleware, integration, infrastructure, cybersecurity, data, and AI. Across 25+ years, directed enterprise IT strategy and digital transformation for Fortune 500 and deep-tech organizations, with full P&L accountability and direct alignment to global executive leadership.

As the founding IT leader of Qualcomm India, grew the operation from a single-person setup to a 10,000-employee with 25+ global delivery Centers of Excellence spanning software engineering, ERP and business applications, integration and middleware, cybersecurity, cloud, infrastructure, and IT operations. Governed a \$100M IT portfolio, delivered three multi-billion-dollar M&A integrations (\$5.5B+ combined), and ranked #1 globally for Innovation and Excellence across all Qualcomm IT organizations, four consecutive years. What hundreds of companies are now spending billions to replicate as GCCs, he built from scratch before the model had a name.

Beyond enterprise IT operations, an active AI and Computer Vision researcher at IIT Patna, a doctoral candidate researching quantum computing and enterprise digital transformation, and a Certified Independent Director with formal board governance training equally effective in the boardroom, at the strategic level, and in the technology, architecture reviews where enterprise decisions are actually made.

SIGNATURE ACHIEVEMENTS

Five career-defining outcomes across every dimension of enterprise IT.

01. Built India's Full-Spectrum Fortune 500 IT Organization from Zero

Joined Qualcomm India in 2004 as its first IT employee and built a complete enterprise technology organization from nothing. Over 13 years, grew the operation to 10,000 employees across five cities with 25+ Centers of Excellence spanning ERP, business applications, ITSM, collaboration, CRM, HCM, integration and middleware, cybersecurity, cloud, infrastructure, HPC, engineering IT, and 24x7 global operations — every layer of the stack designed and built from scratch.

Impact: \$100M IT portfolio | 25+ global CoEs | #1 globally for Innovation & Excellence, 4 consecutive years | 99.999% availability

02. Delivered \$5.5B+ M&A Integration Across Applications, Middleware, and Infrastructure

Led IT integration for three complex semiconductor acquisitions with combined enterprise value exceeding \$5.5B. Each integration unified ERP, business applications, middleware, identity systems, cybersecurity policies, engineering platforms, network infrastructure, and workforce technology across global entities under strict IP protection and export-compliance frameworks — every integration delivered on schedule, without production disruption.

Impact: \$5.5B+ acquisition value | 40% post-merger operational improvement | Zero integration-related outages

03. Transformed Multi-Continent Digital Delivery, 40% Faster and 15% Cheaper

As VP of Global Client Management at DecisionOne, directed multi-vertical IT delivery, application modernization, and digital transformation programs across India, North America, and South America, integrating AI/ML analytics, cloud-native platforms, ERP modernization, and API-led architectures across multiple industry verticals.

Impact: 40% release velocity | 15% cost reduction | 20% client satisfaction improvement | 35% GCC capacity expansion | 10% revenue growth

04. Founded and Scaled a Cloud-Native SaaS Company as CTO

Co-founded PropVision India as CTO, architecting the complete technology stack from first principles — cloud-native platform, product engineering, API integrations, DevOps, security, and go-to-market execution — while securing Series A funding within the first year.

Impact: \$5M Series A raised | 30% operational efficiency | 20% market share growth in 18 months

05. Directing AI-Powered Defence Technology in a Mission-Critical Environment

Currently SVP & CIO at a venture-backed defence technology start-up, directing end-to-end IT and digital strategy across cloud infrastructure, cybersecurity, DevSecOps, enterprise applications, and AI-powered operational platforms; architected a defence-grade zero-trust framework and built a cross-functional technology team from the ground up.

Impact: Zero-trust framework deployed | AI-powered MVP in field-readiness | Series A growth trajectory supported

ENTERPRISE TECHNOLOGY & LEADERSHIP CAPABILITIES

Full-spectrum coverage across every layer of enterprise IT, from strategy to execution.

PROFESSIONAL EXPERIENCE

SVP & Chief Information Officer Sep 2025 – Present • India

Stealth Defence Technology Start-up (Venture-Backed, Confidential)

Senior technology executive leading end-to-end IT and digital strategy for a high-growth, venture-backed defence technology start-up in a mission-critical, security-classified environment; full P&L accountability across all technology functions.

STRATEGY, APPLICATIONS & DIGITAL DELIVERY

- ✓ Defined and executing a multi-year enterprise technology roadmap covering enterprise applications, cloud-native infrastructure, DevSecOps pipelines, enterprise data architecture, AI-driven operations, and digital workplace strategy aligned to international product and market-entry objectives.

- ✓ Overseeing the enterprise application portfolio including ERP, project management, collaboration, and engineering toolchains; directing application integration, middleware, and data governance frameworks to support operational scalability.
- ✓ Driving rapid prototyping and iterative development of AI-powered operational tools integrating computer vision, sensor analytics, and automation modules; partnering with engineering and product teams on MVP design and field-deployment readiness.

SECURITY, GOVERNANCE & ADVISORY

- ✓ Architected a defence-grade zero-trust cybersecurity framework covering identity and access management, endpoint security, network segmentation, classified data governance, and export compliance.
- ✓ Primary technology advisor to founders, board, and investors, translating complex technology decisions into business outcomes; structured vendor partnerships, technology licensing, and IP-aligned delivery frameworks supporting Series A growth.
- ✓ Established KPI dashboards, delivery scorecards, and technology governance frameworks monitoring platform performance, release velocity, infrastructure reliability, and cybersecurity posture, with full CAPEX/OPEX ownership.

Strategic Technology & Management Consultant Jan 2025 – Aug 2025 · Hyderabad

InfoTech Consultancy

- ✓ Advised C-suite and senior leadership across technology and manufacturing sectors on digital transformation strategy, IT operating-model design, GCC strategy, cloud migration, and India-site scalability.
- ✓ Shaped technology investment roadmaps, enterprise application modernization plans, and capability-center strategies for mid-market organizations.

Professional Development, Doctoral Research (Full-Time) May 2024 – Dec 2024 · Malaysia

Manipal GlobalNxt University

- ✓ Completed full-time Doctor of Business Administration (DBA) research covering AI strategy, quantum computing enterprise readiness, digital transformation governance, and next-generation IT operating models.

VP, Global Client Management Jun 2019 – Apr 2024 · India / N. America / S. America

DecisionOne Corporation

- ✓ Led multi-vertical IT delivery, application modernization, and client management operations across three continents; directed engineering teams, integration platforms, infrastructure operations, and end-to-end digital solution delivery.
- ✓ Achieved 15% cost reduction, 20% client-satisfaction improvement, and 40% increase in release velocity through agile transformation, DevOps adoption, and continuous delivery; expanded GCC delivery capacity by 35% through workforce development and process re-engineering.
- ✓ Defined enterprise digital transformation roadmaps integrating AI/ML analytics, cloud-native platforms, ERP modernization, and API-led architectures; delivered 10% annual revenue growth through advisory-led and partner-led digital initiatives.
- ✓ Championed diversity, inclusion, and leadership development programs across multi-site, multi-geography operations; mentored and developed high-performing technology leadership teams.

Co-Founder & Chief Technology Officer Oct 2017 – May 2019 · Hyderabad

PropVision India Pvt Ltd

- ✓ Co-founded and led the technology function for a PropTech start-up; defined architecture, product roadmap, cloud infrastructure, API design, and go-to-market strategy; secured \$5M Series A funding.
- ✓ Delivered 30% operational efficiency improvement through cloud-native platform innovation; achieved 20% market-share growth within 18 months of launch.

Director of Information Technology, Founding India IT Leader Apr 2004 – Sep 2017

Qualcomm India (NASDAQ: QCOM, Fortune 500 Semiconductor)

Joined as the first and only IT employee of Qualcomm India; built one of the most sophisticated enterprise IT organizations in the country from zero. Grew to 10,000 employees, 25+ global CoE's, \$100M P&L accountability, five cities, in 13 and half years owning every layer of the enterprise IT stack: applications, platforms, middleware, integration, infrastructure, security, and operations. Every team hired and scaled from scratch, every system designed and delivered from the ground up.

ENTERPRISE APPLICATIONS, ERP & BUSINESS SYSTEMS

- ✓ Directed the complete enterprise application portfolio: ERP on Oracle and SAP; HCM including Workday and Oracle HCM; CRM on Salesforce; ITSM on ServiceNow; collaboration platforms including SharePoint and Confluence; procurement on Oracle and SAP.
- ✓ Owned application portfolio strategy, rationalization, upgrade cycles, and vendor management across the full business-applications footprint; governed application security, data quality, integration integrity, and business continuity for all Tier-1 enterprise systems.
- ✓ Governed engineering IT application platforms including Perforce, GIT, Gerrit, Jenkins, Chef, LSF, SAN Batch, Ecloud, Vdesk, CRMDB, and Business Intelligence platforms supporting Qualcomm's global chip design, verification, and product development.

INTEGRATION, MIDDLEWARE & DEVOPS PLATFORMS

- ✓ Directed integration and middleware architecture across the enterprise: MuleSoft and TIBCO, API management, message queues, event-driven data flows, and enterprise service bus operations connecting ERP, HCM, CRM, ITSM, and engineering systems into a unified fabric.
- ✓ Governed DevOps and CI/CD platform strategy across engineering and business systems, achieving continuous delivery for Tier-1 applications and 40% improvement in release velocity through automation, standardization, and platform consolidation.

M&A INTEGRATION ACROSS EVERY LAYER

- ✓ Led IT integration for three major semiconductor acquisitions (Spike \$19M, Atheros \$3.1B, CSR \$2.4B), \$5.5B+ combined enterprise value; each covered ERP harmonization, application consolidation, middleware migration, engineering-toolchain unification, network integration, cybersecurity alignment, identity harmonization, and workforce technology onboarding — delivered on schedule with 40% post-integration operational improvement.

CYBERSECURITY, COMPLIANCE & GOVERNANCE

- ✓ Built and governed the complete cybersecurity infrastructure covering identity and access management, endpoint protection, network security, and application security; implemented data-sovereignty compliance frameworks aligned to STPI, SEZ, and government regulatory requirements.
- ✓ Governed IP protection and export compliance for semiconductor design data across India operations; engaged with STPI, SEZ authorities, NASSCOM, IESA, and government technology councils on IT policy, regulatory compliance, and ecosystem development.

INFRASTRUCTURE, CLOUD & OPERATIONS

- ✓ Directed enterprise infrastructure strategy across five cities including a flagship \$22M Tier 3 data center in Bangalore, SAN/NAS storage, HPC compute farms, NFS/DFS distributed storage, Unix/Linux/Windows infrastructure, networking, endpoint operations, and structured cabling.
- ✓ Operationalized 24x7 follow-the-sun NOC/BOC across US, India, and APAC; seeded and scaled IT Operations Center, Helpdesk, Desktop Field Services, Asset Management, Mobility, Identity, Messaging, AV, Telephony, and End User Experience functions from zero; sustained 99.999% availability across 13 years.

- ✓ Delivered \$5M annual OPEX savings against a \$100M IT budget through platform rationalization, application consolidation, vendor renegotiation, and cloud migration.

COE BUILD, CULTURE & TALENT

- ✓ Seeded, built, and scaled 25+ global IT delivery CoEs covering software engineering IT, ERP and business applications, integration and middleware, cloud, cybersecurity, mobility, identity, messaging, BI, DevOps, infrastructure operations, engineering IT, Lab IT, and Wireless; ranked #1 globally for Innovation and Excellence four consecutive years with 90%+ employee satisfaction.
- ✓ Developed strategic partnerships with IITs, NITs, BITS Pilani, and IIIT Hyderabad for research collaboration, internship pipelines, and campus hiring; championed workforce localization, diversity, and women-in-technology programs.

Sr. Manager, IT Customer Support & Projects Nov 1995 – Mar 2004

Samtech Infonet Ltd

- ✓ Directed nationwide IT infrastructure and LAN/WAN deployment projects; achieved 20% reduction in delivery timelines, 10% cost reduction, and 20% productivity improvement across concurrent programs.

EDUCATION

Doctor of Business Administration (DBA) — Quantum Computing & Digital Transformation, Manipal GlobalNxt University, Malaysia

M.Tech (Master of Technology) — Artificial Intelligence & Data Science Engineering, IIT Patna

MBA (Master of Business Administration) — Information Technology, Amity University, India

MCA (Master of Computer Applications) — Cyber Security Specialization, Manipal University, India

MA (Master of Arts) — Economics, Andhra University, India

CERTIFICATIONS

Project Management Professional (PMP) | Six Sigma Black Belt | Certified Independent Director (IICA / MCA)

Advanced Cybersecurity Certification, IIT Roorkee | Microsoft Certified Systems Administrator (MCSA) | ITIL Foundation Certified

BOARD & ADVISORY POSITIONS

- ✓ Certified Independent Director, Indian Institute of Corporate Affairs (IICA) / Ministry of Corporate Affairs; qualified and empanelled to serve on corporate boards, audit committees, risk committees, and technology advisory boards for listed and unlisted companies. Brings a rare combination of deep technology expertise spanning applications, middleware, integration, cybersecurity, AI/ML, quantum computing, cloud, ERP, semiconductor IT, and GCC operations with formal governance training particularly valuable for technology-intensive organizations, GCC parent companies, and deep-tech start-ups seeking board-level technology oversight.

THOUGHT LEADERSHIP & RESEARCH

- ✓ Active researcher at IIT Patna in AI and Computer Vision, developing automated deep learning systems for enterprise applications; research paper in progress for publication.
- ✓ Doctoral research on quantum computing enterprise readiness, hybrid classical-quantum architectures, post-quantum cryptography (ML-KEM, ML-DSA, SLH-DSA), and implications for data-intensive industries.
- ✓ Published thought leadership on LinkedIn spanning Generative AI in enterprise IT, digital transformation strategy, GCC operating models, cybersecurity governance, and quantum computing readiness.
- ✓ Speaker and representative at NASSCOM, IESA, and government technology councils on India's technology ecosystem and semiconductor policy.
